

Dear Valued Customer.

It's time to share some exciting news with you!

Computer Resources has always had a reputation for providing exceptional customer support. Our commitment to serving you and your schools has been reflected in the feedback we get on nearly every call we take. In fact, the activity and energy within our support and services group is what attracted me to the company when I joined 6 years ago.

Along with our commitment to support, we have also worked hard to provide a SIS that helps your schools run smoothly so you can focus on serving your students. To help accomplish that, I'm happy to announce that Computer Resources, all of our staff, and the Vision SIS, has been acquired by Focus School Software, from St. Petersburg, Florida!

We have been searching for a strong technology partner for some time, one that could help us offer a technology solution that matches the quality of our support team. From our extensive evaluations, Focus was the clear leader.

Along with a modern, entirely web-based SIS, Focus offers a leading K-12 Enterprise Resource Platform, Payroll, HR Package, and integrated attendance kiosks. Both Focus and Computer Resources share a passion for education, exceptional customer service, and making sure that you have all the resources you need to serve your students and communities.

Above all remains a shared commitment to you and your schools. With this acquisition, and when you are ready, you will have access to many more of the features that you've requested over the years, in a modern platform that has been serving some of the largest school districts in the country.

Over the past 12 years, Focus has developed a lot of fans among schools of all sizes. Focus currently supports districts with as few as 700 students and as many as 200,000. They serve more than 60% of students in Florida, Ft. Worth Texas, Los Angeles Unified School District, Baltimore County, and schools in Maine, New Hampshire, Massachusetts, and New Jersey.

Amherst, New Hampshire has been working with Computer Resources since 1995. Rhonda Pisani, their School Operations Coordinator recently said, "One thing we've always appreciated about Computer Resources has been their support. They understand what schools need, and have always been very easy to work with. This acquisition sounds like a great combination!"

You will have a lot of questions! In the following link, I hope some will be answered, and that you'll start to see why we are so excited by this acquisition and what it means for you (<https://focusschoolsoftware.com/focus-vision/>). But that's only a start- Please feel free to contact your account manager, or me directly, with any questions.

Sincerely,

Mike Bronder
